DETAILED ACTION***Claim Rejections - 35 USC § 103***

Claims 11-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Honeycomb Products in view of Paneltec.

As to claims 11-14, 17-22, 24 and 25, structural panels having a honeycomb core and outer skin with optional laminate is shown by Honeycomb Products Corporation (HPC). Further shown is that the outer skin may have layers of "anti-skid", "moisture resistance", "poly-coated" and the like. While the use of a "board as a layer for the outer skin is inherently notorious in the making of structural panels, Paneltec, on pg. 2 of 9, clearly teaches that "hardboard" is an old and well known "face material". (Further see pg. 2 of Bellcomb who teaches plywood skins.) Filling the cells of a structural panel as called for by claims 15 and 16 is old and well known design choice to strengthen and or insulate the cell. As to claim 23, structural panels are shown as being well known in floors, staging and decking. A bowling alley is nothing more than a "decking" or "floor" intended for use the game of bowling. As such to have used honeycomb panels in bowling would have been an obvious matter of design choice. It would have clearly been within the skilled of one in the art to have designed such panels to with stand the impact, wear and conditions well known to bowling. Alternatively, Brunst teaches the use of structural panel members for use in a bowling lane. Using structural panels for their intended purpose is not considered a patentable advance. As to claim 26, using structural panels to span beams is inherent in their use as a building element. As to claim 27, the design of panels to endure the environment that they are subjected to is obvious. Known in a bowling alley is that the "approach area" and that the "pin deck" received more impact caused by the delivery of the ball and the action of the pins respectively. They are designed more durably. To have changed the thickness of the elements in the panels in order to change their mechanical properties would have been obvious in order to allow the panel to perform in its intended environment.

Response to Arguments

Applicant's arguments with respect to claims 1-10 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Winter and Belanger show structural panels.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
